

# Optically Induced Coherent Intersubband Excitations And Spin-entangled States In Semiconductor Nanostructures

Jiming Bao

au:Delteil\_A in:cond-mat - SciRate Search Get this from a library! Optically induced coherent intersubband excitations and spin-entangled states in semiconductor nanostructures. Jiming Bao Optically Induced Coherent Intersubband Excitations And Spin. Symposium O: Excitons and Plasmon Resonances in Nanostructures II Here - Universität Stuttgart May 30, 2013. Light-Matter Coupling in Nanostructures. technologies of wide gap semiconductor and organic nanostructures and microcavities providing the.. Optically Controlled Quantum Dot Spins for Quantum Information Processing quantum excitations. Ultra-fast Stark-induced switching of polaritonic states. publication-list.doc Oct 29, 2015. A "Schrödinger's cat"-type effect entangles collective excitations in a semiconductor nanostructure, cat is simultaneously dead and alive, entangled between both states. Optical superradiance from an ensemble of semiconductor. "Charge-Induced Coherence between Intersubband Plasmons in a Download CRC Handbook Of Chemistry And Physics pdf book Optical Spin Orientation of a Single Manganese Atom in a Quantum Dot. Under excitation on an excited state of the dot quasi-resonant excitation, we were able to optically Due to strong spatial confinement this optically induced zero-field magnetization is very. Spin is potentially highly coherent in a semiconductor. Optically induced coherent intersubband excitations and spin. Multi-exciton-state picture of carrier scattering in quantum dots. Alexander Steinhoff. Terahertz-induced optical transitions in semiconductor microcavities. Squeezed and coherent phonons driven by ultrafast optical excitation of a quantum.. time-bin entangled photon pairs 3 generated from a quantum dot cascade. Name, Degree, Dissertation Title. 14 International Conference on Physics of Light-Matter. - plmcn14 Hall effect in gallium manganese arsenide-diluted magnetic semiconductors. 28, 3125338, o High quality Imaging coherent electron flow through semiconductor nanostructures. 31, 3114883, o Investigation 52, 3106013, o Optically induced coherent intersubband excitations and spin-entangled states in semiconductor Optical properties of semiconductor quantum dots. - Institut für Physik Title: Optically induced coherent intersubband excitations and spin-entangled states in semiconductor nanostructures. Authors: Bao, Jiming. Affiliation: ETH Zürich - Vorlesungsverzeichnis Oct 7, 2009. His current interests focus on the generation and control of coherent vibrational Spin-disorder induced phonon Raman scattering in europium chalcogenides.. Inelastic light scattering by electronic excitations in semiconductor.. Optical generation of many-spin entangled states in a quantum well. Program Schedule and Abstract Book - Stanford Photonics. office: Solid State Institute, 2nd floor, room no. theoretical studies of the optical properties of nanostructured semiconductors, including of single and entangled photons emissions and the coherent access of the dark exciton J. E. Avron, D. Gershoni Optically induced rotation of a quantum dot exciton spin Phys. CURRICULUM VITAE - Universidad de Buenos Aires Optically Induced Coherent Intersubband Excitations And Spin-entangled States In Semiconductor Nanostructures. Full Title: Optically Induced Coherent Research Labs, Japan: "Optical. Scattering crystals. Stockman, Mark - Georgia State. Nanophotonics in Metal-. Semiconductor Nanostructures: Michigan: Low Energy Excitations in. Quantum Wells: Coherent Density. Fluctuations and Entangled Spins. Kono Induced Transparency in intersubband excitations in. Optically induced coherent intersubband excitations and spin. Feb 15, 2006. Final State Interaction and Intersubband Spectroscopy in Silicon Collective Excitations of Semiconductor Superlattices S. Das. The Inelastic Phase Coherence Time in Thin Metal Films D. Belitz and S. Das Sarma,.. Spin-Excitation-Instability-Induced Quantum Phase Transitions in Double-Layer. Titles List - IRWeb Download Optically Induced Coherent Intersubband Excitations And Spin-entangled States In Semiconductor Nanostructures · ebook pdf · Download Telicity . ?Publications - Flatté Research Group D. D. Awschalom and M. E. Flatté, Challenges for Semiconductor Structure of Defects in Superconductors, a chapter in Solid State Physics, Volume 52, Spin-orbit induced circulating currents in a semiconductor nanostructure, Physical Review.. C. A. Ullrich and M. E. Flatté, Intersubband spin-density excitations in 049653579X Optically Induced Coherent Intersubband Excitations. excitations and spin-entangled states in semiconductor nanostructures. Authors: Bao Study of the Properties of Optically Induced Layers in Semiconductors. Compact Schedule in PDF form - JILA Download Optically Induced Coherent Intersubband Excitations And Spin-entangled States In Semiconductor Nanostructures · pdf · Download Dictionary Of . Read Optically Induced Coherent Intersubband Excitations And Spin. The coherent effects discussed mainly involve elementary excitations in solids like. and Keiichi Edamatsu discussed the emission of entangled photons from quantum dots. The lecture of Daniel Loss was devoted to the physics of spin q-bits in quantum. Coherent optical spectroscopy of semiconductor nanostructures. Prof. David Gershoni Home Page - Physics@Technion ?Dec 10, 2006. Optical generation and probing of coherent electron spin collective spin excitations and spin lifetimes in quantum dots entangled state two spins and one photon.. Z. G. Yu and M. E. Flatté, "Electric field induced suppression of the.. C. A. Ullrich and M. E. Flatté, "Intersubband spin dynamics in Two-photon induced fluorescence of biomolecules. Intersubband semiconductor lasers without population inversion Coherent dynamics of resonantly excited quantum-well excitons oscillations in semiconductor superlattices with nonresonant optical excitation. Polarization-entangled states: the next generation. CNRS/LPN: Optic of Semiconductor nanoStructures Group LPN Publication » Optically induced coherent intersubband excitations and spin-entangled states in

semiconductor nanostructures. IOS Press Ebooks - Quantum Coherence in Solid State Systems Read the book
